

## **Computer Engineer responsibilities include:**

- Performing periodic analysis of computer hardware and software using available technology and testing tools
- Responding to computer-related issues and providing technical support to staff members
- Overseeing the company's cloud storage accounts to guarantee they're protected and secure

### **Job brief**

We are looking for a Computer Engineer to join our team and support our organization's computer networks along with our Information Technology (IT) department.

Computer Engineer responsibilities include designing, testing, and inspecting all software used within an organization's computer system.

Ultimately, you will be responsible for upgrading various types of hardware like routers and motherboards as needed.

### **Responsibilities**

- Conduct validation testing for new and renovated motherboards
- Ensure existing computer equipment are up-to-date
- Stay up-to-date with the latest technologies and incorporate new technology into existing units
- Draft new computer equipment blueprints and present them to management
- Plan and manage the production of computer hardware equipment

### **Requirements and skills**

- Proven work experience as a Computer Engineer or similar role
- Strong knowledge of design analytics, algorithms, and measuring tools
- Excellent verbal and written communication skills
- A creative thinker with good analytical abilities
- Proficient in problem-solving to resolve issues in a timely manner

- Bachelor's degree in computer engineering or computer science training preferred
